

Tube Room Update

Evan Carpenter

January 24, 2023

Delivery:

- ▶ MSU delivered 150 tubes last Friday. 0 Bent.
- ▶ Next delivery is this Thursday Jan 26th.

Tube Testing:

- ▶ MSU's Leak detector is up and running! Reinhard says it has been working since December.
- ▶ Mod 37 and 38 are ready and covered in Tube Room.
- ▶ There are enough good tubes for Mod 39.
- ▶ Only 155 MSU tubes from different dates still need leak test.
- ▶ Lots of tension and leak tests were done in the past week, many new tubes are now ready.

TOTAL	1352	9	1350	1343	1326	1340	1329	1316	11	561	755

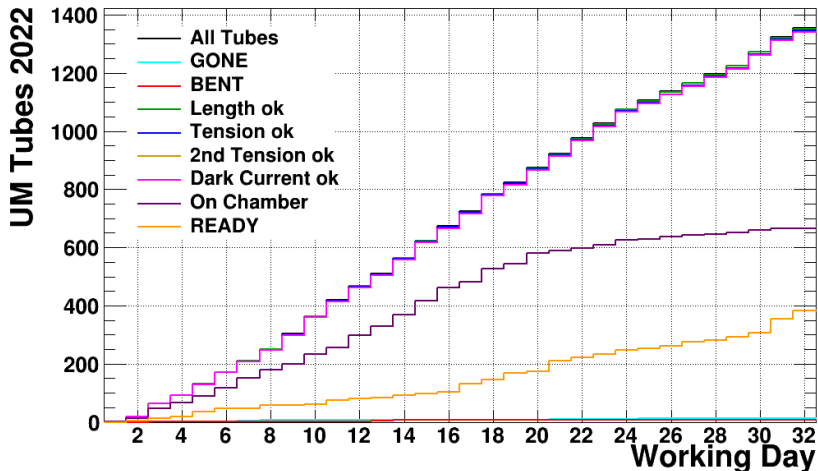

- ▶ 1,236 MSU Tubes + 755 UM Tubes = **1,991 Total Ready**
- ▶ Accounting for Mod 37 and 38:

$$1,991 - 464 - 464 = \mathbf{1,063 \text{ Ready After 37, 38}}$$

- ▶ Rough manual count showed ~ 1,050 good, so this number should be accurate.
- ▶ More sorting needs to be done to check T2 status.

Figure: Currently there is no way to keep track of individual dates' leak tests. I subtract it at the end so the total number of "Ready" tubes is accurate.
